## SUMMARY

---

Full-stack developer in 2nd year of B.Tech (Computer Engineering) with hands-on experience building and deploying web applications end-to-end. Comfortable working across the stack — from React frontends to Flask/Python backends, MySQL databases, and third-party API integrations. Eager to contribute to real-world projects and grow in a team environment.

## TECHNICAL SKILLS

---

|                          |                                                                           |
|--------------------------|---------------------------------------------------------------------------|
| <b>Languages</b>         | Python, JavaScript, C, C++, Java                                          |
| <b>Frontend</b>          | HTML, CSS, React, TypeScript, Tailwind CSS                                |
| <b>Backend</b>           | Flask (Python), REST APIs, Google OAuth 2.0                               |
| <b>Databases</b>         | MySQL, Oracle, PostgreSQL, Firebase                                       |
| <b>Tools &amp; Other</b> | Selenium (Web Scraping), Pandas, NumPy, Scikit-Learn, Git, Linux (Ubuntu) |

## PROJECTS

---

### QuickLift — Peer-to-Peer Carpooling Platform

Sem 4 · 2025

Python (Flask) · MySQL · JavaScript · Leaflet.js · OSRM API · Google OAuth 2.0 · APScheduler

- Built a full-stack carpooling web app allowing users to publish and discover rides with real-time GPS tracking and dynamic fare calculation.
- Implemented dual authentication: email OTP and Google OAuth 2.0 (via Authlib), with a complete booking and passenger management system.
- Integrated automated email notifications (Flask-Mail/SMTP), live location tracking (Geolocation API + Leaflet.js), and scheduled background jobs (APScheduler).

### Farmer Subsidy & Scheme Recommendation System

Sem 4 · 2025

Python (Flask) · MySQL · HTML/CSS/JavaScript · Selenium · Flask-Mail (SMTP)

- Developed a web platform for farmers to browse government subsidy schemes across machinery, seeds, cattle, and irrigation categories.
- Automated data collection by building a Selenium web scraper to extract and structure scheme details directly from official government portals.
- Designed a user-friendly interface with secure login, category filtering, and SMTP-based email notifications.

### E-FIR Portal with Role-Based Access

Sem 4 · 2025

HTML · CSS · JavaScript · Firebase (Auth + Realtime DB)

- Built a citizen-facing portal for filing FIRs online, with a separate police dashboard for managing and updating case statuses.
- Implemented role-based access control and real-time email notifications via SMTP on case status changes.

## Automated Credit Risk Assessment Engine

Sem 4 · 2025

Python · Pandas · NumPy · Scikit-Learn · Matplotlib · Seaborn

- Built an end-to-end ML pipeline to predict credit card approval decisions from historical applicant data, replacing manual review logic.
- Engineered features around default history, debt-to-income ratio, and employment patterns; evaluated multiple classification models for precision.

## AI-Based Nutrition Tracker

Sem 2 · 2024

React · TypeScript · Tailwind CSS · PostgreSQL · Vite · Lovable Cloud

- Developed a nutrition tracking web app that calculates personalised calorie needs and tracks daily meal intake with real-time macro updates.
- Deployed on Lovable Cloud — live at [nutri-bharat-tracker.lovable.app](https://nutri-bharat-tracker.lovable.app)

## EDUCATION

---

### B.Tech in Computer Engineering — CGPA 7.9 (up to Sem 3)

2024 – 2026

Chandubhai S. Patel Institute of Technology (CSPIT), Charotar University, Changa

### Class 12 (Science) — 87.23%

2023 – 2024

The School of Science, Rajkot · GSEB

### Class 10 — 90.51%

2020 – 2021

Sunshine Educational Institute, Talala · GSEB

## CERTIFICATIONS

---

- Foundations of Data Structures & Algorithm Analysis — Coursera
- Algorithm Design: Mastering Computational Problem Solving — Coursera
- Data Analysis with Python — Great Learning
- Core Java & C for Beginners — Great Learning
- Google Workspace (G Suite) — Google
- 50+ DSA problems solved on competitive coding platforms
